**DRAFT: Consent to Ecology of Peace CVID – weapons & power – Denuclearization Definition**

The EoP Amicus submitted to CCT 23-10: The Citizen v Robert McBride [tc-v-rm.tygae.org.za] argued that South Africa's Truth and Reconciliation Commission was negligent or a fraud, denying both sides – Apartheid and Anti-Apartheid – an honest enquiry into the root – WiP Intl law breeding & consumption above ecological carrying capacity limits – causes of all racial, religious, class & gender resource conflict; including South Africa's Apartheid and Anti-Apartheid resource conflict.

Attached for your consideration: EoP Applicants [eop-applicants.tygae.org.za] and FSB & NSA military officials [eop-trc-ds.tygae.org.za]: EoP TRC to End Abel and Kane Cold War [eoptrc-akcoldwar.tygae.org.za] negotiations to implement [eop-nwo-sco.tygae.org.za] EoP Scientific and Cultural law [eop-scicultlaw.tygae.org.za] as international law: (i) CCT 23-10 Amicus Consent<sup>1</sup>; (ii) DRAFT: Consent to Ecology of Peace CVID – weapons and power – Denuclearization Definition.

### Clarification of Terms:

#### **[EoP RH FR] EoP Functional Interpretation of Objective Reality Transforming the World Constraints for Sincere Peaceniks / Honourable Warriors:**

Ecology of Peace Radical Honoursty Factual Reality [eop-rh-fr.tygae.org.za] and EoP Scientific & Cultural Law [eop-scicultlaw.tygae.org.za] are EoP culture’s functional group shared system of thought & action frame of orientation & object of inter-species relating devotion interpretation of reality for individuals whose object of devotion/values include: (i) honest – race, religious, gender & cultural – relationships; (ii) an ecological carrying capacity based perspective of observable factual social contract reality; & (iii) non-violent cooperative root cause problem solving.

[1] Earth is not flat.

[2] Resources are finite.

[3] When humans breed or consume above ecological carrying capacity limits, it results in ecological overshoot, resource depletion and resource conflict.

[4] Some of the socio-cultural and psycho-political consequences of overpopulation & consumption collision with declining resources include: poverty, slavery, unemployment, food shortages, food inflation, cost of

living increases, urban sprawl, traffic jams, toxic waste, pollution, peak oil, peak water, peak food, peak population, species extinction, loss of biodiversity, peak resources, racial, religious, class, gender resource war conflict, militarized police, psycho-social and cultural conformity pressures on free speech, etc; inter-cultural conflict; legal, political and corporate corruption, etc.

[5] The root cause of humans breeding and consuming above ecological carrying capacity limits is the 'right to breed and consume with total disregard for ecological carrying capacity limits' clauses of the Masonic War is Peace international law social contract.

[6] If individuals, families, tribes, races, religions, political parties, corporations and/or nations sincerely – aka ecological literacy [ego-eco-literacy.tygae.org.za] – want to (a) sustainably protect natural resources for future generations; and/or (b) reduce class, racial and/or religious local, national and international resource war conflict; and/or (c) enable honourable, transparent and humane international cooperative de-industrialization and depopulation of the planet to return to living in accordance to ecological carrying capacity limits; they should (d) cooperate [eop-cooperator.tygae.org.za] to nullify the 'right to breed and consume with total disregard for ecological carrying capacity limits' clauses and replace them with Ecology of Peace clauses that restricts all the worlds citizens to breed and consume below ecological carrying capacity limits; or be humanely eliminated from the planetary genepool.

### **EoP Scientific and Cultural Law [eop-scicultlaw.tygae.org.za].**

Scientific Law: Ecological Carrying Capacity — Eco Footprint [eop-footprint.tygae.org.za] — Scientific Law refers to: \* Procreation below carrying capacity limits; \* Consumption below carrying capacity limits.

Cultural Law: Human Nature Scientific Law refers to: \* Fully Informed Consenting Agreements.

Individuals Rights and Duties under EoP SciCult law include: Responsible Freedom [responsible-freedom.tygae.org.za] citizens are entitled to Property Ration [property-ration.tygae.org.za] and Cultural Self Rule [cult-law-self-rule.tygae.org.za].

Violations of SciCult Law are called Crimes of Aggression [crimes-of-aggression.tygae.org.za]. Crimes of aggression will be sentenced as follows: (a) negligent: sent to ego literacy [ego-eco-literacy.tygae.org.za] classes to learn how to communicate what they want and/or don't want honestly, listen, confirm in/accuracy of interpretations, etc; (b) intentional: death penalty: they shall be given the opportunity to remove their genes from the planetary genepool by their preferred method of assisted suicide, within two weeks of sentencing and/or by a particular date as decided by the sentencing judge; and if not done by such date, will be humanely and orderly assassinated by law enforcement appointed assassination squad officials. EoP SciCult Law [eop-scicultlaw.tygae.org.za] includes court proceedings suggestions info.

Responsible Freedom Fully Informed Consent Self Rule [cult-law-self-rule.tygae.org.za]:

Under an EoP Scientific and Cultural law [eop-scicultlaw.tygae.org.za] international law; Cultural Informed Consent laws shall allow responsible freedom individuals with sexual, violent, anti-social or fringe religious or cultural proclivities to lawfully relate to other individuals who share their particular fringe racial or religious socio-cultural self or other relating eccentricity – for example: Armin Meiwes and Bernd Brandes [Barcroft TV: [Interview with a Cannibal](#)<sup>1</sup>; All That's Interesting: [This Cannibal Placed An Ad To Eat Someone — And Someone Said Yes](#)<sup>2</sup>; The Guardian: [Victim of cannibal agreed to be eaten](#)<sup>3</sup>] – in terms of fully informed consent relating practices in private venues.

A Sustainable society practices Sustainable Procreation and Sustainable Natural Resource Utilization Behaviour; i.e. all of its citizens consume and procreate below carrying capacity. Sustainable Natural Resource Utilization Behaviour involves the utilization of renewable natural resources—water, cropland, pastureland, forests, and wildlife—exclusively, which can be depleted only at levels less than or equal to the levels at which they are replenished by Nature. The utilization of non-renewable natural resources (NNR's)—fossil fuels, metals, and minerals—at any level, is not sustainable.

***Carrying Capacity Sustainability: I=PAT Equation:***

For activities to be genuinely sustainable it must be possible for them to continue indefinitely. The impact of humanity on the environment and the demands that people place on the resources available on the planet can be summarised by what is known as the Ehrlich or IPAT equation,  $I=PAT$ . I = impact on the environment or demand for resources, P = population size, A = affluence and T = technology. The two most important conclusions deriving from this IPAT footprint relationship are that: (i) the Earth can support only a limited number of people, at a certain level of affluence, in a sustainable manner; and (ii) Population and Consumption must be reduced to below carrying capacity.

***Carrying Capacity aka Biocapacity Limits:***

“The maximum number of individuals that can be supported sustainably by a given environment is known as its ‘carrying capacity’. Worldwide the total amount of biologically productive land and sea amounts to 12 billion global hectares (gha); or 1.8 gha each if divided by 6.7 billion each. Guerrilla Laws are drawn up in accordance with the proactive conservation policies of Bhutan, who set aside 40% of their biologically productive to be returned to its natural state, for other species and wildlife conservation purposes; then that means that the total amount of biologically productive carrying capacity land available to humans is 60% of 12 billion; which amounts to 7.2 billion gha total; or 60% of 1.8 gha, which is 1 gha each. Population factor is relevant, because the more humans there are, the less biologically productive land there is for everyone else. For example:

***Biocapacity limits of 6.7, 3.5, 1 Billion, 500, 250 & 100 Million:***

7.2 billion global hectares of biologically productive land and water divided by (a) 6.7 billion humans, equals: 1.07 gha each; (b) 3.5 billion equals 2.05 gha each; (c) 1 billion equals 7.2 gha each; (d) 500 million equals 14.4 gha each; (e) 250 million equals 28.8 gha; (f) 100 million equals 72 gha each.

***Procreation Factor:***

As noted, the more people there are; the less biologically productive land there is available for everyone else. According to the research of Paul Murtaugh [sq-pmurtaugh.tygae.org.za], the procreation factor that should be added by ecology footprint organisations to their Consumption footprint calculators, is 20 per child. Put differently: [Each Child increases a parent's cumulative consumption footprint by factor of 20](#)<sup>6</sup>.

***Sustainable (Leaver Eco-Innocent) v Unsustainable (Taker Scarcity Combatant):***

An individual's IPAT footprint is a result of: (A) Consumption Footprint multiplied by (B) Procreation Factor (Every child increases parents footprint by factor of 20). If their IPAT footprint is below carrying capacity limits, they are an Eco-Innocent Leaver; if their IPAT footprint is above carrying capacity limits, they are a Scarcity Combatant Taker.
